meenakshi.pradeep1@gmail.com | linkedin.com/in/meenakshipradeep | github.com/meenakship3 | [Portfolio](#)

TECHNICAL SKILLS

Languages: Python, TypeScript/Javascript, Dart, Java;

Frameworks/Tools: Flutter, React, Next.js, Tailwind CSS, Node.js, Express.js, REST API, FastAPI, Firebase, MongoDB, SQLite, PostgreSQL, Claude Code (AI-assisted development), Git/GitHub, GitHub Actions (CI/CD), Jest, Selenium, Bash/Shell Scripting, Jira;

CS Coursework: Data Structures & Algorithms, Operating Systems, Database Technology, Computer Networks, Object Oriented Analysis & Design, Artificial Intelligence & Machine Learning, Advanced Web Application Development, Android Applications Development

EXPERIENCE

Software Developer (Freelance), aluplast India | *Dart, Flutter, Firebase* | [GitHub Repo](#)

March 2026 – Present

- Sole developer on a production Flutter app replacing WhatsApp-based sales workflows; delivered across 3 modules with Agile-style POC review cycles, currently in beta with national and regional sales heads onboarded
- Implemented SMS OTP and email/password credential linking, Firestore security rules with field-level mutation protection, and role-based routing across 5 designated dashboards
- Built automated sales data pipeline processing daily email reports with 98% reliability over 5 weeks in production
- Optimized dashboard queries with composite indexing and caching, reducing load time by 66% across 41,000+ records
- Configured Google Cloud bucket for daily Firestore backups to Google Cloud Storage via cron job

Operations Associate – Growth, Eblity

June 2022 – July 2023

- Designed and executed analytics-driven campaigns, growing users to 100,000+ while prioritizing user satisfaction and retention
- Led the launch of a WhatsApp-based course, partnering with product engineering teams, coordinating requirements and testing to ensure scalability

PROJECTS

Safeskin - Cosmetic Product Safety Analyzer | *FastAPI, PostgreSQL, Selenium, Next.js 15, React 19, TypeScript* | [GitHub Repo](#)

December 2025

- Architected RESTful backend with **5 FastAPI endpoints** serving **2,000+ scraped products**, featuring automatic OpenAPI documentation, Pydantic validation, and CORS middleware
- Designed PostgreSQL schema with pg_trgm **fuzzy search** enabling typo-tolerant queries ("concelar" → "concealer") using GIN indexes and **trigram similarity scoring** (0.1+ thresholds)
- Developed Selenium web scraping pipeline with regex-based ingredient parsing, Color Index code removal, and **database caching layer** to eliminate redundant scrapes

Lockbox - Encrypted API Key Manager | *Node.js, Electron, SQLite, AES-256-GCM, Jest, GitHub Actions* | [GitHub Repo](#)

November 2025

- Engineered encryption system with **AES-256-GCM authentication** tags, **parameterized SQL queries** for injection prevention, and multi-threshold expiry alerts (7-day, 1-day, expired)
- Implemented SQLite CRUD operations for token management with Bash/.env export support and **15-minute session-based auto-lock** mechanism
- Established CI/CD pipeline with GitHub Actions running automated **Jest tests achieving 70%+ coverage** across Ubuntu, Windows, and macOS

Python Shell | *Python, subprocess, readline, shlex, pathlib* | [GitHub Repo](#)

July 2025

- Implemented **8 Bash commands** (cd, pwd, echo, type, history, exit, output redirection via > / 1>) in Python, demonstrating understanding of Unix process model and PATH-based executable resolution
- Built interactive shell UX using readline and rlcompleter for tab-completion across builtins and PATH commands with zero third-party dependencies

EDUCATION

SRM Institute of Science & Technology

July 2024 – July 2026

Master of Computer Applications

- CGPA: 9.50/10

Azim Premji University

Bachelor of Arts in Economics

ACHIEVEMENTS & INITIATIVES

National Topper

November 2025

IIT Kharagpur / NPTEL

- Ranked in the top 5% in the "Ethical Hacking" exam among 17,000+ exam registrants

Technical Content Writer

June 2025 – Present

LinkedIn & Medium

- Published **Machine Learning** (ML) explainer series on LinkedIn (6K+ impressions from 150 followers), simplifying complex algorithms to make technical topics accessible to broader audiences
- Authored [AI-driven software development article](#) on Medium; invited to contribute to 3M-views/month tech publication
